EXPERIENCE

Graduate Assistant
Sep 2026 – Present
Ph.D. Hub at NYU Tandon

- Improving the NYU AI chatbot for current and prospective doctoral students by mapping likely question types and testing them across varied phrasings to catch inaccurate or unclear answers
- Researching engagement across 500+ doctoral students to find gaps in Hub outreach, then designing flyers, marketing videos, and website updates to close them

Product Design Intern
June 2026 – August 2026
Yerba Buena Gardens Conservancy

- Led end-to-end product design of a mobile app to grow Gen Z engagement at YBG, whose outreach wasn't showing up on the channels younger visitors use
- Found through user research that 5 of 6 Gen Z interviewees didn't recognize YBG and all 5 staff interviewed called Gen Z a gap; ran 2 usability tests and turned insights into 4 core features, iterating wireframes and Figma prototypes to 84.8% task success
- Built a Figma design system (components, variants, auto-layout) and coded it into a functional MVP with Lovable and Cursor, giving YBG its first Gen Z-facing channel, with implementation documentation so their IT team could launch it

UX Design Apprentice
June 2025 – Aug 2025
BRIDGEGOOD

- Led as Product Lead on Onvero, a mobile app connecting undocumented individuals to verified legal resources, conducting 12 stakeholder interviews and research sessions, synthesizing findings into 3 design priorities, in partnership with 5 organizations
- Raised task success from 30% to 70% across 2 rounds of moderated usability testing (n=10) by addressing low user trust with State Bar-verified links, a map of in-person locations, and an explanation of how resources are sourced
- Presented the final concept and research findings at a BRIDGEGOOD showcase hosted at Wells Fargo HQ

PROJECTS

UX Designer
Sep 2026 – Present
Active Portfolio Management with Machine Learning and Time Series Forecasting | NYU VIP

- Leading UX design of a model-comparison dashboard for a 10-person ML research team evaluating 30+ wheat and WTI crude forecasting models across metrics like Sharpe ratio and P/L, consolidating results each researcher tracks separately into one view
- Structuring the dashboard in Figma, including information architecture, navigation, KPI cards, and chart layouts, then extending an inherited Streamlit dashboard with Claude Code to prototype directly in code and make dense model output easy to scan

Product Designer
Nov 2025 – Present
AtlasTax (Independent Project)

- Designed a mobile tax-filing app for 1.2M international students after interviewing 12 F-1/OPT students, finding 75% were unaware of Form 1040-NR and 83% lacked confidence in their filing accuracy
- Ran 2 rounds of usability testing (3-person think-aloud, 15-person unmoderated) and redesigned 4 broken flows; 86.7% of testers preferred AtlasTax and 93.3% reported reduced filing anxiety
- Pitched AtlasTax in 3 weeks, winning 2nd place at the Lam Family College of Business Product Pitch; now coding a functional prototype with Claude Code to validate technical feasibility beyond Figma

EDUCATION

New York University
M.S. in Emerging Technologies (Conc. in User Experience Design)

San Francisco State University
B.S. in Industrial Design | Minors in Visual Comm. Design & Marketing | GPA: 3.91 | Summa Cum Laude

LEADERSHIP

Marketing Commissioner 08/26'
Tandon Graduate Student Council
Marketing Manager 06/25' – 05/26'
Campus Recreation | 28-person team
President 07/25' – 05/26'
IDSA Student Chapter at SF State

SKILLS

Rapid Prototyping
UI/Visual Design
Usability Testing
Information Architecture
Design Systems
Design Research
Data-Visualization
Wireframing
Illustration
Storyboarding
Interaction Design
AI-assisted Prototyping

TOOLS

Figma
Adobe Illustrator
Adobe Photoshop
Adobe InDesign
Procreate
Miro

AI & DEVELOPMENT

Lovable
Claude Code
HTML/CSS
